

# BUDGET MEMO # 10

---

DATE: March 21, 2013

TO: The Honorable Mayor and Members of the City Council

FROM: Lauren Sufleta, Assistant Director of Utilities

THROUGH: Robert Sisson, City Manager 

SUBJECT: Cost of Additional Water Tank

Councilman Meyer asked about the cost of an additional water tank.

As a rule, water tanks cost about \$1.00 per gallon of capacity; therefore, a 2 million gallon tank would cost about \$2 million. What size tank would be needed (1M, 2M, or 4M gallons) depends on a number of factors. The Utilities Department is currently modeling data to determine the required size.
